Report Period: Oct 22-Nov 5

Summary of Progress in this Period

We confirmed roles and parts of the project each member will be working on. We've initiated the project by starting to think about things like code structure, linters, etc. We have agreed on a plan to initialize the project by getting a round trip application working. Even if our progress is minor, we would like to have a working CI/CD pipeline as well as a basic client and server that can communicate with each other. Additionally, we've started to talk about how we want to test our app.
